Seminar Outline	<p>With the recent and continuing turmoil in the global financial services sector, financial institutions and professionals involved in the financial industry are being confronted by a myriad of challenges arising from the developing liability culture and increase in regulatory oversight. As cash flow is squeezed and a global recession takes hold, we can expect claims against those perceived to have caused “financial loss” to increase. Ultimately E&O and Professional Indemnity insurers may be left to pick up the tab!</p> <p>This seminar will focus on the potential exposures facing financial institutions and professional advisors in Asia following the fallout in the financial markets and the issues which arise for their insurers.</p> <p>Topics will include:</p> <ul style="list-style-type: none"> • An overview of the recent turmoil in global markets and how this is feeding into liability issues; • The types of claims and regulatory investigations being faced by financial institutions and professional advisors in key jurisdictions, including a review of the common causes of action; and • The key insurance issues that commonly arise in this area including scope of cover, notifications, exclusions, aggregation and settlements.
